Course Description:

College-level algebra and trigonometry. Includes equations, algebraic and transcendental functions, inequalities, systems of equations, conic sections, sequences and series, trigonometric functions, polar form, calculator use, and partial fractions. Also includes intensive preparation for analytic geometry and calculus.

Course Objectives:

During this course students will

1. Solve quadratic, quadratic in form, absolute value, polynomial, rational, literal, and radical equations.
2. Define a function by ordered pairs, a graph, and algebraically; use function operations and inverses; use transformations and determine symmetry.
3. Graph polynomial and rational functions; predict the nature of the zeros of a quadratic function, and reconstruct a polynomial from its given zeros.
4. Solve polynomial, rational, and absolute value inequalities.
5. Graph exponential and logarithmic functions; solve exponential and logarithmic equations; and use curve fitting for explanation of arithmetic models.
6. Convert between radians and degrees measures; define, graph, and evaluate the six trigonometric functions and their inverses; solve trigonometric equations algebraically; and use trigonometric identities to simplify expressions and solve equations.
7. Use the standard equations for conic sections and sketch their graphs; identify types of conic sections and determine their features.
8. Graph polar equations; convert between rectangular and polar coordinates; obtain polar form of complex numbers and convert between the polar form and the standard form.
9. Solve linear systems algebraically, graphically, and using matrices; solve nonlinear systems graphically and algebraically.

10. Find the n th term of a sequence; calculate partial sums of arithmetic and geometric sequences; and use the Binomial Theorem to expand powers of binomials.

Student Learning Outcomes (SLOs) :

After completion of the course students will be able to

- Perform operations with functions with/without the use of iPads / graphing calculators.
- Create a mathematical project using PowerPoint.
- Employ technology to set up and solve real world situations.

Texts and Materials: An iPad is required for this class.

Required Text: Precalculus. Publisher: EDUCO. Checking out and returning an Ipad is a requirement to obtain a grade in this class. APPS: The "Free GraCalc" app is recommended.

Evaluation and Grading & Assignments:

Attendance:

The attendance policy for this class is simple. You are all adults who have in some form paid for this class. If you do not wish to come to any session, you do not have to attend. However, you are still responsible for completing work on time. If you are late for class, enter quietly and sit down. You will not be allowed to make up any quiz you miss because of tardiness. In case of a valid emergency, contact the instructor using the information given on the first page. After filling out an absence form, the instructor will decide whether or not the work missed can be made up.

Academic Integrity: Violations of scholastic ethics are considered serious offenses by Tohono O'odham Community College, the Mathematics Department, and by your instructor. Students may consult the TOCC Student Handbook sections on student code of conduct, on scholastic ethics and on the grade appeal procedure.

[a] All homework can be done independently or with other students. The purpose of homework is to develop critical thinking skills and also to develop specific skills related to teaching mathematics by repeated practice of these skills. Without this practice most students find it impossible to perform well in this class. No collaboration is tolerated during exams in-class exams.

[b] Students are expected to abide by the Student Code of Conduct and the Scholastic Code of Conduct found in the Tohono O'odham Community College Student Handbook. Copies are available at the main student bookstore.

Course Feedback:

All materials submitted will be graded and returned the next class period after they are submitted.

Homework Policy:

Homework will be assigned each class period and is due at the beginning of the next class period before the quiz. The solutions to all odd-numbered problems in the text are given in the back of the textbook. Homework sets will contain odd-numbered problems. Late homework will not be accepted unless the student has made an arrangement with the instructor before it is to be turned in.

Withdrawals:

Please be sure to withdraw yourself by **October 26, 2017** if you do not expect to complete the class, otherwise you may receive an "F" grade.

Workload:

Students are expected to spend an average of 18 hours per week attending class sessions, doing assignments and preparing for exams. The standard Carnegie Unit of college credit assigns one credit hour for each 15 hours of class time and assumes that students spend two hours working outside the classroom for each hour of classroom instruction. For a three-credit semester course, this

translates to an average of 12 hours spent outside of class weekly for 8 weeks.

Grading System/Policies:

Your final grade will be calculated as follows:		Grading Scale	
Attendance	100 points	A =	1000 - 900 points
Homework assignments	200 points	B =	899 - 800 points
Tests (7)	300 points	C =	799 - 700 points
Tutorial Time	200 points	D =	699 – 600 points
<u>Final Exam</u>	<u>200 points</u>	F =	less than 600 points
Total possible	1,000 points		

Incomplete (I) grade:

To receive an “ I “ grade, you must have finished at least 3/4 of the course requirements and specifically request the grade. Please call before the last week of class to be sure that there is sufficient time to consider your request. An incomplete grade generally implies that a student has shown sufficient initiative to complete the course on his or her own. You will receive a copy of the standard “I” form filed with the grade. This form details specifically what must be done to complete the course. A student has one year to complete the required work, after which the grade automatically reverts to an “F.”

Make-up Assignments:

No make-up assignments will be given and no late assignments will be accepted unless the student has made prior arrangements with the instructor.

Extra Credit Opportunities: You can take any homework, any test, or the Final Exam **up to 3 times. Best score is recorded.**

Final Grades: Students will receive a grade transcript from the college mailed to the address given with registration materials at the end of the semester when all grades have been recorded. At the EDUCO site, educosoft.com you are able to see your grade

SPECIAL NOTE TO STUDENT: For privacy and security reasons, instructors are advised **NOT** to give grades over the telephone.

DISCLAIMER: This syllabus is designed to evolve and change throughout the semester based on class progress and interests. You will be notified of any changes as they occur.
